- We reach all 22 and more than 190 destinations
- Groupage containers directly shipped to your region
- Clear and simple invoicing

Teaming up with Gebrüder Weiss brings a strong partner to your side. You can put your trust in Gebrüder Weiss as they are real China experts. We will prove it to you.

We know China inside out

We created our first valuable contacts in China already in 1978. 17 years ago Gebrüder Weiss opened its first field office in China. We are proud to be able to put our experience of many years and our inside knowledge of the country and its speciality to our customers' best advantage.

Parlez-vous Chinese?

We do. At least our associates in China do. They will be of additional vital assistance in the face of language barriers and in providing qualified on-site support.

Flexibility within the network

16 branch offices with full operational capabilities make us flexible. All agents involved in transports to and from China are our own employees and form an integral part of the orange family. We place high value on being able to make quick decisions and provide fast responses.

Asia meets Europe

Multi-cultural affiliation makes us strong. Our European employees' expertise coupled with our Chinese employees' knowledge of the Asian market and the Chinese mentality makes for an ideal combination.

Your personal China expert

All of our employees are trained continuously. Topics do not only cover professional issues, but focus on knowledge of the country, its people and unique Chinese characteristics.

China Competence Center

Should there ever be a problem, the China Competence Center is close at hand. Available at any time we will always find a solution for any problem.

190+ destinations in all 22 provinces

Our network is not only vast but constantly growing. We export goods directly to more than 190 destinations and reach all 22 provinces. In addition, Weiss-Rohlig holds the coveted Chinese A-license, which brings our customers numerous advantages.

Groupage containers directly shipped to your region

The more times goods have to be transhipped on the way from China to Europe, the higher the risk that the shipment will sustain damage. Sending groupage containers directly to your region minimizes this risk – not to mention transit time and costs.

Flight details within 1 hour

Service is the key to our success. Therefore we forward all flight data concerning export transports to China to our clients within 1 hour and the flight data concerning import shipments 1 day before dispatch of the goods at the latest. China House Bill of Ladings will be sent out 1 day after departure of the vessel.

Quotations for China transports in maximal 4 hours

We react promptly to inquiries on transports to or from China. Our quotation will be in your hands in maximal 4 hours.

Invoices are clear and simple

Clear accounting methods and transparently posted items ensure we are all speaking the same language when it comes to invoicing.
